#### **Disclaimer**

This presentation may contain forward-looking statements that reflect management's current views with respect to certain future events and potential financial performance. Although Sampo believes that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of various factors.

Important factors that may cause such a difference for Sampo include, but are not limited to: (i) the macroeconomic development, (ii) change in the competitive climate, and (iii) developments in capital markets.

This presentation does not imply that Sampo has undertaken to revise these forward-looking statements, beyond what is required by applicable law or applicable stock exchange regulations if and when circumstances arise that will lead to changes compared to the date when these statements were provided.

#### Key takeaways from this presentation

This presentation and sustainability in general at Sampo Group are structured around five themes: business management and practices, corporate culture, investment management and operations, products and services, and communities.

Sustainability is an important focus area for Sampo Group and, therefore, development around the most material themes is constant and a key priority for the Group companies.

Sampo Group measures its sustainability performance on a group-level using several key performance indicators (KPIs), some of which are highlighted in this presentation.

The ambition is to develop the KPIs further, study new possibilities, and improve the sustainability-related disclosure continuously.

The presentation is updated quarterly, however some data is only updated annually, and therefore year end or full year figures are provided.

# Sustainability programme

- Sampo Group has a sustainability programme, which drives group-level sustainability work.
- The programme consists of strategic sustainability themes and material sustainability topics.
- The programme also links the sustainability work to the business operations of the Group companies, as well as to the UN Sustainable Development Goals.
- The sustainability programme evolves, as common projects are completed and targets reached, or new priorities emerge. Every three years the programme undergoes a bigger update.
- There is also a detailed internal version of the programme available, which includes activities under each theme, targets for the activities, an overall timetable, and a division of responsibilities.

Net Promoter Score (NPS) is an index ranging from -100 to 100 that measures the willingness of customers to recommend a company's products or services to others. It is used as a proxy for gauging the customer's overall satisfaction with a company's product or service and the customer's loyalty to the brand. Transactional NPS (tNPS) is meant to assess the customer's opinion on a certain business transaction. The score shows whether customers want to recommend a company to others after they have been in contact with the company.
